

## One Day Seminar on 'Needs & Opportunities in Renewable Energy'

Date :12 August 2018

Venue :Dr. Ambedkar College of Social Work, Wardha.

### **Guest & Resource Person :**

Chair Person :Dr. Milind Sawai  
Principal,Dr. Ambedkar College of Social Work, Wardha.

Guest Resource Person : Mr. Nitin Deshmukh,  
Director, Picontext Technology Pvt. Ltd, Wardha.

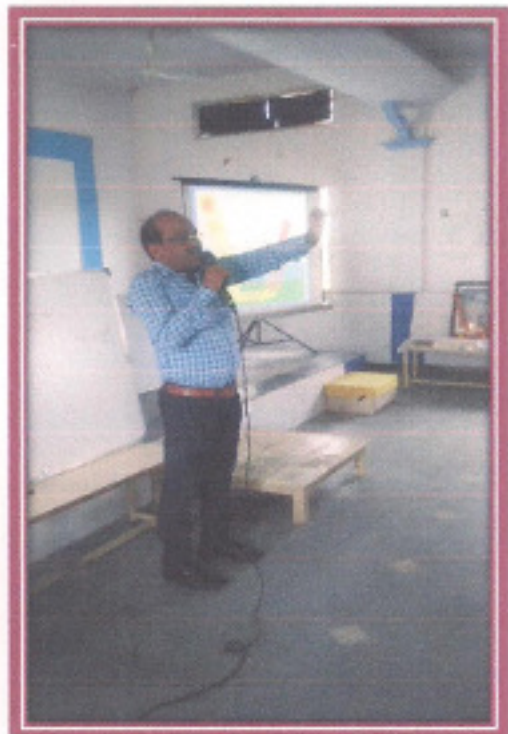

Resource Person :Mr. Rupesh Pande.

In the race of internal development we become responsible for destroying the sources of natural renewable energy. In future availability of petrol and diesel use also become critical task for everyone. It indicate that in future we may face lot of problem. So it is our primary responsibility to use the renewable energy properly. For identifying the opportunity in this sector, we arranged the seminar on 'Need and Opportunity in renewable energy.

Seminar was inaugurated by Dr. M.A. Sawai principal, Dr. A.C.S.W. Wardha. In his speech he explained the importance of renewable energy through various examples. Mr. B.N. Khelkar explain the basic objectives of this workshop.

### **Objectives of workshop:**

1. To aware the participant (students) the basic concept of renewable energy.
2. To sensitize the participant regarding the utility and importance of renewable energy.
3. To be aware about the employment and opportunity in renewable energy sector.

4. Motivate the students for conducting awareness campaign regarding the use of renewable energy.

This seminar was conducted in two sessions. In first session inauguration and basic information of renewable energy was provided by guest. Second session was focused on carrier opportunity and renewable energy.

In first technical session Mr. Nitin Deshmukh focused on the types of renewable energy sources. He also

explained the importance of energy. How to use the natural resource is also main theme of his session. He explained the subject technically. For providing the detail explanation he

present his topic through power point presentation on solar energy plant and installation process at private and institutional level. Regarding solar energy several schemes, subsidies and cost plan and its operating system was discussed. Moreover how use of solar electrically reduce the cost and added in main electrical consumption.

In the second session Mr. Rupesh Pande explained the carrier opportunity. He also explained that it has vast area for carrier development. So student must be prepared for it.

In this seminar 220 students take participation. All the faculties and Non-teaching staff attend this seminar. Dr. A.R. Bhele expressed the vote of thanks.

#### **Outcomes of Seminar**

1. Participant comes to know the basic concept of renewable energy and its types.
2. The way of proper use of renewable energy.
3. To available carrier opportunity in renewable energy sector.
4. Student feel motivation towards the use of renewable energy.
